11. THE CONCEPT AND LEARNING OUTCOMES (including description of the profile of the graduate):

The Visual Arts major is based on a comprehensive education in the field of visual arts and leads to the acquisition of knowledge, skills, and social competencies in applying various artistic and design media. The program concept is based on the complementarity of the education of the future visual artist, who is able to meet the demands of the present day, and who is able to combine the activities of an artist and a designer in selected visual arts sub-disciplines of interest to him/her. On the one hand, it deals with traditional forms of expression such as painting, drawing, printmaking and sculpture, but also with contemporary techniques and technologies such as photography, multimedia, and intermedia. On the other hand, it complements the student's skills and competencies with those essential on the labor market and related to undertaking a project in the creative industries. The program is complemented by subjects in the

field of theory and history of art, contemporary art, and classes preparing the student to take an active role in contemporary cultural and artistic life, science in the discipline of fine arts, and conservation of works of art, and cooperation with professional institutions for the dissemination of visual culture.

The wide range of possibilities offered within the individual studios of the Institute of Visual Arts and the personal approach to the student resulting from the nature of the studies allows the student to choose his/her path already after the first semester based on natural creative predispositions and interests. The training within the selected modules of design arts and fine arts allows, on the one hand, to focus on those aspects and forms of creativity which correspond to the student's predispositions and interests and, on the other hand, to combine the student's search in the area of individual artistic activity (painting, graphic art, sculpture) with the professional and design path taken by him/her. The M.A. diploma, which is a visual arts project realised within the framework of two equivalent diploma studios, selected one each from the optional design arts module and the optional fine arts module, together with a theoretical thesis, which is an independent study of a selected research topic specific to the visual arts, leads to the conclusion of the second-level education, confirms the learning outcomes achieved and proves a comprehensive visual arts education.

Learning outcomes:

- gaining knowledge, competencies and social skills required for independent artistic, scientific and professional work based on learning outcomes including student's personal interests.
- development of the ability to independent explorations of new forms, means of expression and media, allow the use of interdisciplinary contemporary and future language
- development of the ability to move in selected areas of art and design activities of the plastic arts,
- imparting in-depth theoretical knowledge in the area of fine arts, art sciences, developing a reflective attitude, artistic awareness, perspectives allowing basic research activities in the discipline of fine arts and art conservation,
- preparation for active participation in culture and art at local, national and international levels as its organizer and participant.

The following factors have been taken into consideration when determining the study program:

- tradition of art education in the field of visual arts, in which a fundamental place for the artistic development is a master studio, - the basis of didactic work in the master-student relationship, including an emphasis on the importance of education in the field of fine arts for future design cadres,
- on account of the general academic profile – the artistic-research activities carried under University staff in the field of visual arts and art conservation, resulted in development of work direction, reflections, look at the art confronted with the theoretical thoughts, art education and other fields of study
- modern technical and technological development allowing students to create medial complexed works and plastic projects, preparing them for functioning in complicated reality, in which various means of expression mix with each other creating phenomenon described as intermedia and multimedia,
- course placement in University allowing the pursuit of interdisciplinarity and cooperation with representatives of other disciplines and a scientific and artistic field, finally placing students in multicultural, complexed community, offering possibilities of cooperation and contribution to the university
- Świętokrzyskie regional needs, associated with necessity to deliver labour providing support for local creative industry, which are functioning on the basis of strategy for Kielce city and Świętokrzyskie voivodship development, and show a big interest in our graduates still at the stage of education, for example: for. institution involved in the dissemination of culture and art, institutions, companies, organizations with promotional structures and companies working closely with advertising, publishing and exhibition design,
- internationalization being an important aspect of modern art, artistic exchange via student's preparation – future graduates to readiness for changes including those based on place of residence, work, participation in international projects, artistic initiatives, the attitudes of openness toward different beliefs, traditions, cultures and nationalities.

Profile of the graduate:

A graduate of the visual arts major is a comprehensively trained visual artist and a participant, organizer of contemporary culture, using the interdisciplinary language of art, moving proficiently in both the area of the chosen sub-discipline of fine arts and design arts. Thus, he is prepared to conduct individual artistic and design activities. His experience allows him to freely combine classical and contemporary art media and apply them for applied purposes. Subjects in the field of culture and contemporary art, promotion, and dissemination of visual

culture lead to a complete cognitive perspective, development of a creative attitude, openness to new challenges, and taking on various roles related to functioning in society as an artist. Graduates are prepared to undertake professional work in institutions of visual culture, mass media, design teams and promotional structures, and independent artistic and research work in the discipline of fine arts and art conservation.

Possibilities of continuing education:

Graduates may continue their education at doctoral schools in the discipline of Fine Arts and Art Conservation and independently apply for the award of the degree of Doctor of Arts in the designated discipline to units holding such authorization. Graduates can broaden their education in postgraduate studies in the field of plastic arts but also in other areas, including undertaking pedagogical qualification studies for school teaching.

14. METHODS AND MEANS FOR VERIFICATION OF LEARNING OUTCOMES ACHIEVED BY THE STUDENT DURING A FULL CYCLE OF STUDY

Evaluation of the effectiveness of achieved learning outcomes is carried out in accordance with the WSZJK-U/2 procedure at the Jan Kochanowski University, Faculty Procedure for verification of learning outcomes No. WSZJK-WS/2.

Tutor lays down the detailed rules for learning outcomes and verification procedure, then places them in the syllabus. The achievement of all learning outcomes specified for individual classes means meeting the implementation of assumptions of the educational concept on the field of study and achievement of learning outcomes (achieving graduate profile). Assessment and verification of learning outcomes achieved by student during a full cycle of study is performed by:

- 1) the graduation process - the subject of which is the visual arts work realized within the framework of the master's art and design studio and the theoretical work, arising within the framework of the Proseminar and Master's Seminar, which is an independent development of a research problem specific to the area of visual arts. The diploma realization verifies the assumed learning outcomes and is evaluated by the supervisor, the theoretical thesis supervisor, the annex supervisor and the reviewer.
- 2) **international student exchange** – obtaining information's from students regarding gained knowledge, skills and social competencies in the context of visiting partner university
- 3) **scientific circles achievements**- feedback information through an obtained external review (scientific publications, presentations from conferences, Rector's and Minister's scholarship),
- 4) **art and design students achievements** – obtaining feedback information regarding gained knowledge, skills and social competencies while participating, organizing, co-organizing exhibitions, various artistic projects such as workshops, summer and winter art academy, shows, competitions, art and design reviews
- 5) **monitoring the fate of graduates** - obtaining feedback information regarding gained knowledge, skills and social competencies and their efficiency and relevance to labor market
- 6) **surveys of opinion of employers**- Surveys of opinion of employers regarding study programme, including specified learning outcomes and method of verification, especially regarding practical education.

Additionally, the assessment of the implementation of the learning outcomes are:

- 1) **Phased work** - undertaken by students during their studies, such as:
- 2) – in case of theoretical classes (lectures and classes): *tests, examinations, course-work, papers, presentations, case studies*. Tests, examinations, course-work, project – as instructed provided by the tutor. All additional ways of passing the subject needs further instructions.
– in case of practical classes (classes): *course-work – artistic course-work – design including wide range of artistic media, such as painting, drawing, sculpture, print making, digital graphic, graphic design, movie and animation, intermedia and multimedia forms, construction works presented as completed art or design realizations appropriate documentation (photographic, descriptive) saved on print and digital media*. Those forms require additional information:
- 3) **examination of subjects**. Prepared examination questions should not go beyond what is included in syllabus carried out within lectures. The student has the right to know the reasons for the scores awarded by tutor.
The form of an examination: oral, written, test or practical is determined by tutor and included in syllabus.
 - a) **oral examination** should be carried out in the presence of other students or workers.
 - b) **written examination** can be organized in test or written form. The examination is performed in the didactic room, where the appropriate student arrangement is possible, comfort and independence of work is assured. The examiner has a right to stop or revoke examination process, in a case of dependence of a student's work (student uses nonapproved materials, device or help of other persons).
- 4) **Test and test with credit**. Tutor defines the criteria of credit, gives the components and written justification of the mark awarded to a student.

Forms and methods of teaching, as well as assessment criteria and its components are specified in the course charter. Details of verification of learning outcomes are defined by - Faculty Procedure for Verification of Learning Outcomes WSZJK_WS_2.

All verification procedure of student's achievement obtained during selected semester are reported in the student's periodic achievement form.
